

Product information from SMART Identify labelling machines.

Dynamic 120 with Concorde

Series 1000 Dynamic with concorde

Max speed 40 m/min
Max reel diameter 280 mm
Max label liner width 120 mm

The Dynamic is a labeler of contained weight and foot print.

Advance control unit. Which is independent for the operator can be located anywhere.

Concorde articulated peeler, typically used for convex surfaces. It can apply one label around two adjacent sides of a moving product.
It includes roller adapter.

Options : Encoder , Product collector.

This system was designed for labelling on paper A4's C-wrapping with a label to be placed in a specific position in relation to the C- wrapping on the paper.

The products are coming to the system in reached position and are keep moving in the 2-roller system. A sensor is detecting the reference point on the product so the label can be C-wrapping according to this point.

The Dynamic-120 dispenser with integrated Concord Applicator controlled by an Advanced control unit , is applying the label. This allows an automatic label speed control by "Encoder" quick change the set up time .

The system can work with small and large product.

The system consist of

- Label dispenser Dynamic 120 series 1000
- Prefeed belt conveyor
- Structure and Floor stand with adjustment
- Product sensor
- Encoder for automatic speed control
- Product collector for 100 pices with adjustable knob
