Options : Encoder , Product collector.

This system was designed for print and apply on sleeve box with a label to be placed in a specific position in relation to the decoration on sleeve box.

The products are coming to the system by the feeder in reached position and are keep moving in the P&A system. A sensor is detecting the product ,so the label can be applying on top according to position specify.

The Series 4000 dispenser with integrated Zebra Module ZE400 controlled by an Advanced control unit , is applying the label. This allows an automatic label speed control by "Encoder" quick change the set up time .

The system can work with small and large product.

The system consist of

- friction feeder BF-350
- Prefeed belt conveyor with vacuum unit
- Structure and Floor stand with conveyor belt
- Product sensor
- Series 4000 with Zebra module Print and Apply
- Product collector by 300 width conveyor
