

## Product information from SMART Identify labelling machines.

### EME 2120 with Rigid peeler

#### Series 2000

Max speed 35 m/min

Max reel diameter 270 mm

Max label liner width 120 mm

Product save up to 45 products

The EME2120 is a labeler of contained weight and foot print.

Built-in control unit. Which is compact for the operator easy to operation any time

#### Prefeed PVC Belt Conveyor

- PVC Green belt / t = 2 mm
- Stainless steel base
- Side plates in stainless steel.
- Photocell for product detection
- The system can be label on square and round buckets
- Speed adjustable 10-20 m/min
- Options : Encoder, Product collector. Tower light

- This system was designed for labelling filled buckets, with a label to be placed in a specific position in relation to the decoration on the bucket.

- The buckets are coming to the system in fixed position and are keep moving and A sensor is detecting the reference point on the bucket, so the label can be apply according to this point

The Dynamic-120 dispenser with integrated Concord Applicator controlled by an Advanced control unit, is applying the label. This allows an automatic label speed control by "Encoder" quick change the set up time.

The system can work with small and large product.

#### The system consist of

- Prefeed PVC Belt conveyor
- Label applicator EME2120
- Aluminium profiles Structure and Floor stand with adjustment
- Product sensor
- Stainless side guide adjustable.
