LD-100 dispenser

Easy use

Flexibel

Moveable

Strong

2 speed levels

Table top dispenser LD-100

LD-100 is a semi-automatic label dispenser in a strong construction. It has a switch for 2 speed settings and motorized rewinding of the backing paper. Detection of the label is made with a photosensor, detecting the backside of the label material.

The dispenser is designed for non transparent materials.

LD-100 makes it easy to label products in a manual process.

The operator only needs to lift the label and the photosensor will give signal to drive the papermaterial forward, releasing the label and bring a new label in position.

Specifications:

Max. paper width: 105mm.

Label length 6-150mm, depending on the label material.
