

A6 ELECTRONIC PAGING MACHINE

Scope of application :

1. Packaging bags: Plastic bags, Cartons, Paper bags, labels, papers etc;
2. Cards: IC cards, IP cards etc.

Application :

used to automatically separate stacks of packaging bags or cards and convey single piece onto the conveyor belt so as to facilitate TIJ,CIJ,DOD or laser coding machine to spray print or spray etch the date of production, batch number, anti-fake mark, pattern, etc., and thus reduce the trifles of manual paging, make full use of the advantages of high-speed spray printing of coding machine and laser machine and improve spray printing efficiency, meanwhile, it is equipped with the function of intelligent counting and automatic stop to facilitate production management.

- paging mode : friction / reversing type
 - separate width : 60-280 mm
 - separate length : 40-320 mm
 - separate thickness : 0.02-5 mm
 - power : 120w, voltage : 220V
 - electronic stepless speed regulation
 - outside size: 250x410x860 mm
- Standard type
